

**UR-CBE MODULE LEARNING OUTCOMES
(ACADEMIC YEAR 2016-17)**

UNDERGRADUATE

1. **Programme Title:** Economics **School of Economics**
2. **Learning Outcomes and Competencies**

A. Knowledge and Understanding

Having successfully completed the module, students should be able to demonstrate knowledge and understanding of:

- A1. Read and provide a critical interpretation of the scientific literature in economics
- A2. Making abstractions that yield analytical simplicity while retaining key features of the problem at hand for analyzing issues in economics;
- A3. Understand the relationship between the key macroeconomic aggregates and understand how the interaction of firms and individuals generates the aggregate outcomes and can solve dynamic optimization concepts in macroeconomics.

B. Cognitive/Intellectual skills/ Application of Knowledge

Having successfully completed the module, students should be able to:

- B1. Apply methods and Techniques in the core area of Economics (Macroeconomics and Microeconomics) and Econometrics methods,
- B2. Solve optimization problems faced by consumers and producers under certainty and uncertainty and derive the general equilibrium of an economy
- B3. Solve dynamic optimization concepts in macroeconomics

C. Communication/ICT/Numeracy/Analytic Techniques/Practical Skills

Having successfully completed the module, students should be able to:

- C1. Solve optimization problems faced by consumers and producers under certainty and uncertainty and derive the general equilibrium of an economy.
- C2. Know how the interaction of firms and individuals generates the aggregate outcomes
- C3. Demonstrate the capabilities of research in the area of economics and interpret the results.

D. General transferable skills

Having successfully completed the module, students should be able to:

- D1. Transfer knowledge from one context to another
- D2. Develops a critical economic thinking and bring social economic transformation to the community through a based research communication.
